

Une boite a bijoux pour Bleurette 28/07/1910

Now that you have made some beautiful jewelry you will have to take good care of them.
This little case is in fact a match – box (Lucifer – match)

Let the slide as is, but cut the cover on the dotted lines as shown in picture 2 and 3. The dark part must disappear and can be used inside the box. Glue the cover on the box after you have decorated the visible part with paint or paper (or fabric!) Make small compartments in the jewelry box.

Glue some nice ribbons on the outside to close your box

The handle is made of a tiny ribbon, decorated with 2 beads (= nails)
